View of current Status of e-science in Spain

- Excellent RedIRIS Network
- Excellent HPC service through RES
- Excellent long term collaboration in Cloud (Grid)
- Very good Infrastructures, but no national data infrastructure yet (we are working on this)
- But we still have to make some effort to integrate everything better.

**Do the users move
their data fast?**

Opportunities of collaboration Spain/Portugal

- To continue good collaboration between RedIRIS and RCTS
 - To integrate MACC in RES
 - To build together a Data Infrastructure
 - Iberian OSC
 - Lifewatch ERIC
- 

THANK YOU
